

## Features and Benefits

- Excellent noise suppression
- Uniform appearance
- Abrasion resistant
- Extremely lightweight
- Does not trap heat or moisture

## Typical Applications

- Panel harnesses
- Body Harnesses
- Tubing, Hoses and Cable assemblies

# Expando<sup>®</sup> QT

Bentley-Harris<sup>®</sup> Expando QT is a lightweight, highly flexible solution used to suppress noise on wires and cable assemblies. Its rugged construction also provides mechanical protection that is superior to foam.

Expando QT is easy to apply with one size fitting multiple applications. In addition, the open weave construction permits drainage and prevents condensation.

Expando QT is braided from a combination of abrasion-resistant polyester monofilament strands and noise suppression polyester multifilament strands.
