

Features and Benefits

- Withstands 400°C for 400 hours while remaining black in color
- Excellent thermal insulation
- Lightweight
- Fluid resistant
- Abrasion resistant

Typical Applications

- Electrical Distribution Systems
- Hoses
- Cable Assemblies
- Tubing

Thermojacket® B

Bentley-Harris® Thermojacket B is a coated, high temperature solution designed to provide superior insulation protection. As an insulator, Thermojacket B is used to provide maximum fuel efficiency and lowered emissions.

Constructed entirely of braided fiberglass, the sleeve allows excellent flexibility in low temperature environments. The product is covered with a black, high temperature coating to ensure maximum insulating efficiency and protection to surrounding components.
