

## Product Highlights

- Continuous long-term heat protection to 540°C
- Low friction
- Extremely flexible
- Attractive appearance

# Thermojacket® R

## Sleeving for long-term heat protection

Bentley-Harris® Thermojacket sleeving provides excellent long-term heat protection for hoses, wire harnesses and cables. Thermojacket is available in a variety of grades, offering industrial users the option of selecting combination of properties best suited to their specific application.

Thermojacket R sleeving is constructed of braided fiberglass. Use of an uncoated fiberglass grade results in slick, cloth-like surfaces both inside and outside of the sleeve attributing to the low friction factor of the product.

The product is capable of withstanding long term and continuous temperatures of up to 540°C and is recommended for applications requiring extreme flexibility.
