

Features and Benefits

- Highly Expandable
- Excellent Abrasion Resistance
- Excellent Flexibility
- Attractive Appearance

Typical Applications

- Electrical Distribution Systems
- Hoses
- Tubing

Expando[®] M

Bentley-Harris[®] Expando M is a flexible, slightly expandable sleeve specifically designed for abrasion protection of electrical distribution systems, tubing and hoses.

Braided with polyester multifilaments, Expando M is lightweight and rugged with an attractive appearance. A high coverage ratio contributes to the product's aesthetic appeal and makes it suitable for visible applications.
