

Features and Benefits

- Non-fraying construction
- E-Glass construction rated to 540°C
- Flame retardant
- Excellent flexibility at low temperatures
- Fluid and chemical resistance
- Excellent thermal insulation

Typical Applications

- Electrical Distribution Systems
- Fuel and Hydraulic Lines
- Cable Assemblies
- Hoses

Thermojacket® K

Bentley-Harris® Thermojacket K is a heat-treated sleeve that provides superior protection against conducted and convected heat. Constructed of knitted fiberglass, Thermojacket K is used to protect components in high temperature areas. Due to its knitted construction, Thermojacket K is fray-resistant. It also provides superior insulation to components that must maintain elevated temperatures to maximize performance efficiency.

Thermojacket K is also used on electrical distribution systems, fuel and hydraulic lines, cables and hoses in close proximity to high temperature environments.
